MAKE ROOM FOR NEW STYLES

A room for you

The bedroom is your place for contemplation, a room for relaxation, a sanctuary of quiet and stillness.

In addition to our neutral colour palette, we have introduced a textured Oak effect finish to our classic collection, adding a warmer option to our range.

Our four exciting new bedroom styles show how you can use our Oak palette to achieve a variation of contemporary looks that will prove timeless and tasteful.

For the perfect finishing touches and to complement our bedroom ranges we have also introduced a classic bedframe, helping to create the ultimate sanctuary.

Designed to inspire

We don't believe limited space, awkward footprints and varying house types should compromise your bedroom style.

Your bedroom furniture should seamlessly balance design and functionality, and with that in mind, our new Oak and bed range combines beautifully finished classic furniture, with fresh, engaging style.

A TOUCH OF LUXE

With a balance of luxury and order, Style 5 takes influence from boutique hotel design to create a lavish master bedroom in a smaller apartment. By incorporating a bookcase into the design, the wardrobes fit seamlessly into the limited space available.

The opulent colour palette of deep blue, metallic silver and crisp whites, cleverly unite classic woodgrain with contemporary luxury. The perfect example of hotel chic.
